

# Signature & Approval Decision Card

**Purpose:** Stop losses at the exact click moment.

## Before You Sign Anything

Ask out loud: **“What does this signature do?”** (wallet popup asking you to approve an action)

- If you cannot explain it in **one sentence** → **Do not sign**

## Approval Rules

- Is this approval required right now?
- Can I set a limit? (maximum amount instead of unlimited)

**If:**

- Unlimited on first touch (first time using a site or contract)
- Vague wording
- Rushed context

→ **Do not approve**

## Confidence Gate

- Describe the action in one sentence
- Rate confidence honestly

**Below 80% → stop**

Run verification or walk away.

## Absolute Rules

- Seeds are never shared (recovery phrase for your wallet)
- Permits = approvals (signatures that grant spending permission)
- Approvals are standing permissions (they remain active until revoked)
- Revoke when done (remove the permission after use)

**Default answer when unsure:** "No, not yet."
